LEATHERED OR HONED MARBLE & GRANITE IN KITCHENS

LEATHERED OR HONED MATERIAL will require more daily maintenance than polished stone material. Since the surface is more open than polished stone the surface is subject to finger prints, metal marks and other signs of daily living will show on the LEATHERED OR HONED surface. Most of the marks can be easily removed with mild cleaning products and Scotch Bright Pad. Tougher stains may require denatured alcohol to remove oil based marks. Marble is subject to etching and staining from all items and products that are acidic based.

It is strongly recommended to apply DRY TREAT to the surface to help with maintenance and protection. (DRY TREAT is an additional charge) Please note that DRY TREAT may darken the LEATHERED OR HONED material. The DRY TREAT 25 YEAR WARRANTY does not apply to LEATHERED OR HONED material.
